The global Biomass Pellets market was valued at 7492.86 Million USD in 2021 and will grow with a CAGR of 7.12% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Biomass Pellets are made of agricultural and forestry residues such as rice stalk, straw, cotton stalk, bamboo sawdust, wood flour, ramie stalk, peanut husk, etc. They are produced by pellet machines or briquetting machines, after going through several processing procedures, such as crushing, drying, mixing, molding or compressing, etc. And the final products are pellets, bars, and briquettes, which are used as a replacement for coal, gasoline gas and other traditional fossil fuels. Biomass Pellet is a kind of renewable fuel. It is widely used in European countries. As Chinese overall economic downward trend in the past few years, in the next few years there will be many uncertainties, and coupled with Biomass Pellets industry situation in the past few years, the current demand for Biomass Pellets product is relatively low.
