The global Biomass Power market was valued at 3037.11 Million USD in 2021 and will grow with a CAGR of 3.55% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Biomass used for power generation can provide a low-carbon and sustainable alternative to fossil fuels while allowing local communities to use domestic biomass resources. It makes productive utilization of wood manufacturing wastes, the unused portion of urban waste and crop residues. North America and Europe is projected to foresee the substantial growth owing to the increasing government support. Factors such as funding programs, investment subsidies, incentives and tax benefits play a significant role in developing the industry in countries such as Germany US and the UK.
