Abstracts

The global Bioreactors and Fermenters market was valued at 111.79 Million USD in 2021 and will grow with a CAGR of 6.17% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

This report studies the Bioreactors and Fermenters market, Bioreactors and fermenters are used for creating proper environment for the growth of microorganisms or driving biochemically active substances derived from such organisms. Fermenters are basically utilized for the growth and maintenance of a population of bacterial or fungal cells in a controlled mode. Bioreactors, the large sized fermenters, are widely used in biopharmaceutical industry for the production of biologics such as monoclonal antibodies, recombinant proteins, and vaccines at a large scale. Bioreactors and Fermenters companies are mainly from United States and Europe, the industry concentrate rate is relatively high. The top three companies are Sartorius AG (BBI), Merck KGaA, Thermo Fisher, with the revenue market share of 16.55%, 15.08% and 11.89% in 2016. The leading factors to have boosted the global demand for bioreactors and fermenters in the past few years include the increased adoption of hybrid technologies, which use single-use and stainless steel systems, and the increasing popularity of single-use disposable bioreactors among biopharmaceutical companies and contract manufacturers. The market is also driven due to the rising prevalence of a number of chronic diseases, which has consecutively increased the world's appetite for

biologics, drugs for orphan diseases, and personalized medicines. These factors are expected to remain at the helm of all major developments expected to be observed in the global market for bioreactors and fermenters in the next few years.
