The global Bipolar Membranes market was valued at 188.22 Million USD in 2021 and will grow with a CAGR of 15.28% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Bipolar membranes carry out the dissociation of water in the presence of an electric field. These membranes are composed of three parts: an anion-exchange layer, a cation-exchange layer, and a hydrophilic interface at their junction. When a direct current is applied, the water molecules migrate into the hydrophilic layer where they are split into H⁺ and OH⁻. Bipolar membrane(BPM) appeared commercially at the end of the 1980s. The global Bipolar Membranes industry has a rather high concentration. The major manufacturers are concentrated in United States, Europe, China and Japan, such as Asahi Kasei, SUEZ, ASTOM, Liaoning Yichen and Tingrun. At present, Asahi Kasei is the world leader, holding 23.71% production market share.
