Bitumen membranes are designed to provide protection to commercial and residential buildings. They are made of organic liquids which are highly viscous, sticky and waterproof. Bitumen membranes are used as a roofing system on nearly flat or flat roofs to avoid any leakage and to shift water off the roof. Bauder group is a Europe based company engaged in manufacturing water-proofing membranes and offers a wide range of styrene butadiene styrene (SBS) modified bitumen based solutions for different projects. They aim at producing products with strong ageing & weathering resistance along with low temperature flexibility to match the North European climatic conditions. Bauder's products include bitumen underlayers, capping sheets and vapor control layers.
