A blind mate connector is differentiated from others types of connectors by the mating action that happens via a sliding or snapping action which can be accomplished without wrenches or others tools. They have self-aligning features which allows a small misalignment when mating.A Coaxial Connector/RF coaxial connector is an electrical connector designed to work at radio frequencies in the multi-megahertz range. RF connectors are typically used with coaxial cables and are designed to maintain the shielding that the coaxial design offers. The global blind-mate coax connector industry has reached the production value of approximately 210 milion USD in 2018. The top three manufacturers are Rosenberger, TE Connectivity and Amphenol. Other key manufacturers include Huber+Suhner, Molex, Radiall, jonhon, Wutong Group and Zhengzhou Aerospace.
