## Abstracts

The global Blood Glucose Monitoring Devices market was valued at 9093.04 Million USD in 2021 and will grow with a CAGR of 5.57% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The global BGM devices market is growing due to the increase in the number of people with diabetes, especially Self-Monitoring Devices diabetes. To avoid high doses of medication and insulin intake, these people are moving toward monitoring blood glucose levels by learning about the technicalities and the usage of BGM devices. Global rise in the prevalence and incidence of diabetes and increasing adoption of continuous glucose monitoring (CGM) systems are the key factors propelling the growth of this market. In addition, continuous technological advancements in blood glucose monitoring devices and rapid growth in aging population are further stimulating the demand for blood glucose monitoring devices. However, inadequate reimbursement and high cost associated with the application of CGM systems and product recalls are some of the key factors hampering the growth of this market.
