Bluetooth smart is a new concept in the whole industry of mobile connectivity. The central concept behind this new technology is that it can connect the devices that have Bluetooth connectivity to interact with one another. In addition to this, efficiency of power is one of the biggest factors that is driving the widespread adoption of Bluetooth Smart technology compared to the conventional Bluetooth technology. Presently, wireless sensors are embedded in most of the electronic devices and customer wearable devices. These wireless sensors can interact with each other with the help of suitable technology such Bluetooth. Hence, the development of the smart wireless sensors is also considered to be one of the key factors helping to drive the growth of the global market for Bluetooth Smart and Smart Ready over the course of the given forecast period of 2015 to 2023. There has also been a significant growth in the number of gadgets and accessories that supports Bluetooth and Bluetooth Ready technology. This is helping to create a strong connected framework for all the electronic devices. Additionally, the market for wearable products is projected to witness a healthy growth in the near future and wearable devices are expected to be enabled with Bluetooth Smart Ready technology. Moreover, the users of this technology do not need to pay for

any additional expenses as the conventional Bluetooth enabled gadgets support the Bluetooth Smart Ready technology and products. The use of these Bluetooth Smart Ready devices have resulted in considerable amount of power saving. Thus, the low power requirements coupled with low costs are some of the other important factors expected to help in driving the overall growth of global market for Bluetooth Smart and Smart Ready devices in the coming years of the forecast period.
