Abstracts

The global Botanical Supplements market was valued at 1536.99 Million USD in 2021 and will grow with a CAGR of 3.83% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Botanical supplements include fresh or dried products in different forms, such as tablets, capsules, powders, and tea bags. Globally, garlic, ginger, santalum, plantago, ginseng, rhodiola extract, red clover extract, and soy extract are some of the most widely used botanical supplements. Rising awareness among consumers regarding the health benefits associated with consumption of botanical supplements such as holy basil extract, which helps in reduction of anxiety is a major factor expected to drive growth in demand for botanical supplements. Owing to increasing advertisements and easy availability of botanical supplements over the counter, demand for these supplements is increasing. Currently, consumers are more inclined towards self-medication due to rising penetration of internet and social media. These factors are expected to drive growth of the market for botanical supplements globally over the forecast period.
