Industrial computers are especially designed to withstand harsh environments (extremes of temperature, dust, humidity, vibration, power surges). BOX IPCs is one kind of industrial PC. Industrial Box PCs are now replacing PLCs for controlling and regulating of applications, such as material handling, packaging, and assembly. The market is driven by various end-user industries, such as Rail transit construction, industrial automation, intelligent service, Electric power and energy and others. The key players are Advantech, Kontron, Schneider Electric, Beckhoff, Siemens, Contec, Mitsubishi , lectric, Omron Corporation, B&R, Rockwell Automation, KEB Automation , AAEON, EVOC, General Electric and so on. Among them, Advantech, Kontron, Schneider Electric, Beckhoff, Siemens are the leaders of this market. The leading companies own the advantages on better performance, more abundant product`s types, better technical and impeccable after-sales service. Consequently, they take the majority of the market share of high-end market. Looking to the future years, the slow downward price trend in recent years will maintain. As competition intensifies, prices gap between different brands will go narrowing. Similarly, there will be fluctuation in gross margin. The industry is expected to remain innovation-led, with frequent acquisitions and strategic alliances adopted as the key strategies by the players to

increase their industry presence. Market stays in mature period with a clear concentration. Meanwhile, optimize product mix and further develop value-added capabilities to maximize margins. Manufacturers can take advantage of this situation by reinforcing their production units and supply-chains to avoid any delay in production turn-around-times (TAT) and supply-lead-times. Significant and lasting barriers make entry into this market difficult. These barriers include, but are not limited to: (i) product development costs; (ii) capital requirements; (iii) intellectual property rights; (iv) regulatory requirement; and (v) Transitions` unfair methods of competition. Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field. Even so, the market is intensely competitive .The study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.
