The busbar is the trending solution for the distribution of electrical power. Busbar system is used in power distribution and consists of prefabricated electrical distribution system in a highly protective enclosure, which basically includes components such as fittings, devices, straight lengths, elbows, and accessories. Busbar system provides the most efficient systems and are capable of optimizing the distribution of medium voltage power in industries where concepts of planned production and scientific factory layouts are applied, ensuring complete safety. With the rising need to alter shop layouts and changes in production patterns to meet the ever-demanding market, busbars provide the necessary flexibility to make such changes quickly, with minimum power shutdown, utilizing the existing cables, conductors and fittings.
