Abstracts

The global Butadiene market was valued at 1811.56 Million USD in 2021 and will grow with a CAGR of 3.36% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Butadiene, also known as 1, 3-butadiene is either in gaseous or refrigerated liquid state and its monomer has many commercial uses. Butadiene is inflammable in nature and needs to be handled with immense care and precision. The production of global BD was 11652 K MT in 2011 and is expected to reach 14956 K MT by 2021, growing at a CAGR of 3.03% from 2016 to 2021. The global market is moderately concentrated with the top ten companies including Sinopec, TPC, Braskem, Shell Chemical, CNPC, FPCC, BASF, ExxonMobil, JSR, Lotte accounting for over 60% of the global market in 2015. Other companies in the market include LyondellBasell, Ineos O&P, LG Chem, SABIC, Evonik, etc. Butadiene is a raw material used in the production of rubber for tires, as well as for electrical appliances, footwear, plastics, asphalt, building materials, and latex. The demand for butadiene is over 1.2 billion MT per year worldwide, and growing. By producing a renewable butadiene, the everyday products made with it, like tires, can become more sustainable, with a smaller environmental footprint. The technological level of butadiene in China has a big gap compared with the international advanced level. Outstanding performance in product application performance is not outstanding, function is not strong, supporting enough, clean low level, product updates slow, long

development cycle. There is little butadiene performance in China at or near the international advanced level. Butadiene industry is affected by the economy and policy, so it's important to put an eye to economic indexes and leaders' prefer. With the global economic recovery, more and more people pay attention to the agricultural field, especially in underdevelopment regions that have a large population and fast economic growth and the downstream application increasing, the need of butadiene maybe increase.
