The global Butyl Rubber market was valued at 4645.5 Million USD in 2021 and will grow with a CAGR of 4.73% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Butyl rubber is the foundation of today`s butyl rubber technology. Butyl rubber is a copolymer of isobutylene and a small amount of isoprene providing for a highly saturated backbone. The primary properties of butyl rubber are excellent air-barrier performance, good flex fatigue and vibration damping. Butyl rubber can be compounded with fillers and other modifiers and then vulcanized into practical rubber products. Owing to its excellent air retention, butyl rubber is the preferred material for inner tubes in all but the largest sizes. It also plays an important part in the inner liners of tubeless tires. (Because of poor tread durability, all-butyl tires have not proved successful.) IIR is also used for many other automobile components, including window strips, because of its resistance to oxidation. Its resistance to heat has made it indispensable in tire manufacture, where it forms the bladders that retain the steam or hot water used to vulcanize tires. The market for butyl rubber is highly concentrated with limited players. The largest producers of butyl rubber in the worldwide are ExxonMobil, Lanxess, PJSC NizhneKamskneftkhim, JSR, Sibur, Sinopec Beijing Yanshan, Zhejiang Cenway Synthetic New Material and Panjin Heyun Group. Production of butyl rubber is North America. Europe, Japan and China are also major producing area of butyl rubber. Since

the production of butyl rubber requires high technical experience, the competition would be moderate in the future.
