The global Cable Accessories market was valued at 4140.03 Million USD in 2021 and will grow with a CAGR of 4.24% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A power cable is a combination of a single or multiple electrical conductors that are held together with a complete covering of insulator. These power cables are used to insulate it from the outer environment. Global cable & accessories market is expected to grow at a sizable CAGR in the forecast period. Key drivers for this market are the burgeoning demand for renewable energy, rapid industrialization and urbanization, globally thriving HVDC projects, and government aids and initiatives to expand and upgrade the existing T&D infrastructure. Upsurge in power capacity on a world scale, offshore wind policies in developing countries, replacement of conventional grids by 'Smart Grids' and upgradation of infrastructure in emerging markets will open new avenues for this market on the forecast horizon. On the other hand, limited funds, complex planning and authorization of projects and the consequent delays in their implementation, steeply priced raw materials, and easily available inexpensive products in grey markets are challenging market growth. Shortage of technical expertise for employing HV projects is also hindering market growth.
