The global Cable Assembly market was valued at 16.53 Million USD in 2021 and will grow with a CAGR of 3.36% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A cable assembly can be created using a number of different casings ? straps, cable ties, cable lacing, sleeves, electrical tape, conduit, braiding, a weave of extruded string, or a combination of the these materials - but the purpose is always to increase the efficiency of the products. Cable assemblies are designed according to geometric and electrical requirements, which are translated into a diagram that is used in the preparation and assembly of the harness. First the wires are cut to the desired length followed by a marking process (either manual or automated) for identification purposes. Next, the wires are stripped to expose their metal cores and assembled together with any extra terminals or connectors housings required. The bundle is then clamped onto a form board or assembly fixture. This finished mass is fitted with any protective sleeves, conduit, or extruded yarn. The entire process is usually completed by hand because of the intricate processing required at various stages of production, such as routing the wires through sleeves, taping, crimping terminals onto wires, inserting one sleeve into another, and fastening the strands with tape, clamps, or cable ties. The leading manufactures mainly are RF Cable Assembly, 3 M, TE Connectivity , Molex and Minnesota Wire. RF Cable Assembly is the largest manufacturer; its revenue of global

market exceeds 13% in 2016. The next is 3 M and TE Connectivity. There are mainly three type product of Cable Assembly market: Data cable assembly, High speed cable assembly and Conventional cable assembly. Data cable assembly accounts the largest proportion. Geographically, the global Cable Assembly market has been segmented into North America, Europe, Asia-Pacific, South America and Middle East and Africa. The Asia-Pacific held the largest share in the global Cable Assembly products market, its revenue of global market exceeds 43.33% in 2016. The next is Europe and North America.
