Cable cleat is a cable management product used to support and hold cables when installed at intervals along the length of cables. These are useful in ensuring long life of cables as they reduce damage caused to the cables due to their own weight. Cable cleats have been useful in applications having heavy cables, power lines and transportation infrastructure. In 2003, the standard of cable cleats for electrical installations, EN 50368, was published, and in 2009, IEC 61914 was published. Since then, cable cleats manufacturers are producing their products under the same standard. CMP Products dominated the market with 14.51% revenue market share in 2018, followed by Prysmian Group and Ellis Patents. Other key companies in this market include Panduit, Dutchclamp, etc. Top 5 manufacturers occupied 22% market in 2018. Asia-Pacific is the largest consumption area, with a market share of 31% in 2018.
