Abstracts

The global Calcium Chloride (CaCl₂) market was valued at 1251.46 Million USD in 2021 and will grow with a CAGR of 4.08% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Calcium chloride (CaCl₂) is a salt, appearing as a white crystal. It is commercially available as anhydrous and dihydrate flakes, pellets and powder, or as a 30-45% solution. Calcium chloride is produced by refining naturally occurring brine, by neutralizing hydrochloric acid with limestone, or as a by-product from the Solvay process of synthetic sodium carbonate (soda ash) production. The major applications for calcium chloride include road deicing, dust control, and oil extraction and completion fluids. In the coming years there is an increasing demand for Calcium Chloride worldwide. Increasing of downstream industry fields expenditures, more-intense competition, launches in introducing new products, increasing of spending on general industry, retrofitting and renovation of old technology, increasing adoption of Calcium Chloride will drive growth in global markets. Globally, the production of Calcium Chloride is not concentrated, as the development and manufacturing technology is not high. Currently, Asia Pacific is the largest production region of Calcium Chloride, mainly benefited by the low labor and raw material cost. The consumption volume of Calcium Chloride is related to downstream industries and global economy. As there will be many potential market for Calcium Chloride, the prospect of Calcium Chloride is still be full of

hope. The product average price declined in the past few years due to the technology development, the average price will keep the trend in the few future years due to increasing mature manufacturing technology and lowering cost of raw materials. Although the market competition of Calcium Chloride is fierce globally, there are many enterprises can obtain considerable profit form the manufacturing and marketing of Calcium Chloride and that is the reason that we believe there will also be enterprises enter this market. But it is suggested that enterprises those have plans to enter this industry have careful analysis of this market and the advantages or disadvantages of themselves.
