Capsule coffee machine is a new kind of coffee machine. Capsule coffee machine manufacturers put the coffee in a sealed aluminum or plastic capsule in advance, then filling it with nitrogen to ensure freshness, so the users can finish the brewing process simply by put the capsule in the capsule coffee machine. Compared with the ordinary coffee machine, this operation is more simply, the volume is lighter, and its costs are cheaper. In the past few years, the price of coffee machine has a little change and we expect the price will slightly lower. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of coffee machine.
