The global Cardiac Arrhythmia Monitoring Devices market was valued at 4451.75 Million USD in 2021 and will grow with a CAGR of 3.21% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Use of ECG monitoring devices and services has skyrocketed over the past decade. ECG has penetrated into different departments owing to its extensive use in mobile cardiac outpatient telemetry and currently in data management for electronic medical records (EMR). The growing number of life threatening cardiac diseases has led to a threefold increase in the demand for ECG monitoring devices and services in hospitals and diagnostics laboratories with the necessary and advanced software services. The aforesaid factors will increase the demand for ECG monitoring devices, data management and services in large integrated healthcare systems. Factors pushing the growth of the global cardiac arrhythmia monitoring devices market include advancements in cardiac arrhythmia monitoring devices, favorable reimbursements for cardiac disorder treatment, increasing incidences of cardiovascular diseases, growing focus on containment of healthcare costs, increasing adoption rate of low cost ECG services among lower income group and favorable government policies for startup companies.
