Cast-resin power transformers encase the windings in epoxy resin. These transformers simplify installation since they are dry, without cooling oil, and so require no fire-proof vault for indoor installations. The epoxy protects the windings from dust and corrosive atmospheres. Cast-resin power transformers encase the windings in epoxy resin. These transformers simplify installation since they are dry, without cooling oil, and so require no fire-proof vault for indoor installations. The epoxy protects the windings from dust and corrosive atmospheres. Global economic growth, increased demand for electricity, expansion of power stations in developing countries and many other factors will drive the transformer market. In the past two decades, the United States and Germany have gradually developed and matured a new generation of environmentally-friendly impregnated dry-type transformers.
