The global Cathode Materials market was valued at 1396.62 Million USD in 2021 and will grow with a CAGR of 3.58% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

During past couple of decades, a drastic surge in the oil price was witnessed in the global market. This was the first crisis alert for the world, the rise in price and scarcity of resources created the necessity for conservation of energy and finding an alternative technology for optimum utilization of resources. Development of renewable energy sources, smart energy conservation and storage technologies, advancements in automotive transmission and driveline systems have triggered significant demand for energy storage technologies. Batteries are one amongst the oldest and extensively used storage technologies globally and their performance vastly depends upon cathode materials. Dynamic end user requirements such as long service life, durability, fast charging and effective response times are some of the necessities which led to advancements and developments in battery material types. Durability, compatibility, efficient and fast charging are key criterion leading to significant developments in cathode materials market. Increasing use of lithium ion batteries in portable electronic accessories and equipment such as laptops, tablets, mobile phones, digital camera etc. are driving growth of batteries in respective applications ultimately resulting in increasing demand for cathode materials. Entry of local and global players into the

energy storage system market are expected to support significant growth opportunities for cathode material suppliers in the market.
