## Abstracts

The global Cell Expansion Technologies market was valued at 110.77 Million USD in 2021 and will grow with a CAGR of 17.69% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Depending upon the type of cell, the global cell expansion market can be broadly split into human cells and animal cells. The human cell can be further divided into stem cells and differentiated cells. Revenue-wise, the human stem cell segment accounts for a dominant share in the market on account of the rising prevalence of various chronic diseases and support provided by the government. In 2016, it held a substantial 58.1% share in the overall revenue in the global cell expansion market. Geographically, the key segments of the market are Asia Pacific, Europe, North America, Latin America, and the Middle East and Africa. Among them, North America is the leading market on account of the concentration of many key players in the region and the increasing research and development in the field. Going forward, North America is slated to slightly pare its market share to hold a 37.7% share in it by 2024. It will still, however, remain the dominant market.
