The global Centrifugal Compressors market was valued at 1708.15 Million USD in 2021 and will grow with a CAGR of .21% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A centrifugal compressor is a type of compressor that utilizes rotating vanes or impellers to compress a gas instead of a piston. This design is used in high-end air compressors as well as on refrigeration units and air conditioners. This type of compressor is able to be used in stages to create ultra-high compression of gasses or air. This type of compressor has fewer moving parts and operates more smoothly than a piston-type compressor. Global giant manufacturers headquarters mainly distributed in Europe, Japan, China, and USA. The manufacturers in Europe and USA have long histories and unshakable status in this field. Manufacturers such as Atlas Copco and Ingersoll Rand have relative higher level of product's quality. As to Japan, Kobelco and Hitachi have become as global leaders. The production centers for leading players are moving to developing countries such as China for their low manufacture cost and developing consumer s.
