Ceramic and porcelain can be found in archeological digs thousands of years ago still harboring their vivid mineral glazes. These stable materials are still unchanged even when all the metals tools are long gone. Similar to colored glaze, decals are made of stable mineral colors. Due to the impact of economic crisis, ceramic decal market developed slowly in recent years. However, with the recovery trend of economy, ceramic decal market will keep growing. Viewed from the supply side, there are many manufacturers in the ceramic decal industry, while from the demand side, the current demand for ceramic decal is growing. In order to feed the changing technical requirements, ceramic decal manufacturers need to pay attention to the technical innovation. In future, digital and reduction of harmful element will be the technology trends of ceramic decal.
