Abstracts

The global CHDM (Cyclohexanedimethanol) market was valued at 164.75 Million USD in 2021 and will grow with a CAGR of 6% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

As a white waxy solid, CHDM is an important organic chemical raw material. Its molecular formula is $C_{12}H_{22}O_4$ and its molecular weight is 144.21. CHDM has two isomers, namely, cis and trans. The trans proportion structure is relatively symmetric, the lattice structure is regular, the lattice energy is high, the melting point is high, and the heat resistance of the product is good. When it is used in the production of pet products such as PETG, the higher the trans proportion is, the higher the heat resistance of the pet will be. The top players cover Eastman, SK Chemicals, Kangheng Chemical, Feixiang Group, etc. Market concentration is high. For the consumption of CHDM, North America and Asia-Pacific are still the leaders, followed by Europe, which take up about 30% of the market share in 2019. Polyester Materials accounted for the largest market with about 86% of the global consumption for CHDM in 2019. With over 13% share of in the CHDM market, Coating Materials was the second largest application market in 2019.
