## Abstracts

The global Chemiluminescence Immunoassay (Clia) Analyzers market was valued at 2313.52 Million USD in 2021 and will grow with a CAGR of 7.08% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Chemiluminescence immunoassay (CLIA) is an immunoassay technique where the label, i.e. the true ?indicator? of the analytic reaction, is a luminescent molecule. CLIA instruments progressively infiltrated the immunometric assay domain, eventually being used to measure serum concentrations of hormones, drugs, vitamins, tumour markers, infectious disease markers, myocardial damage markers and, finally, autoantibodies. Today, autoantibody detection in immunochemiluminescence can be carried out on instruments specifically dedicated to the autoimmunology laboratory as stand-alone instrumentation or as part of an automated analytical platform. Global Chemiluminescence Immunoassay key players include Roche Diagnostics, Abbott, Beckman Coulter, Siemens Healthcare, Ortho Clinical Diagnostics, etc. Global top five manufacturers hold a share over 70%. North America is the largest market, with a share about 40%, followed by Europe, and Asia-pacific, both have a share about 25 percent. In terms of product, Semi-Automated is the largest segment, with a share over 60%. And in terms of application, the largest application is Oncology, followed by Endocrinology, Infectious Disease Testing, etc.
