Chlorine Dioxide is a chemical compound with the formula ClO_2 . This yellowish-green gas crystallizes as bright orange crystals at $-59\text{ }^\circ\text{C}$. As one of several oxides of chlorine, it is a potent and useful oxidizing agent used in water treatment and in bleaching. Steel and PVC are the main raw materials. Chlorine dioxide generator contains electrolytic method chlorine dioxide generator and chemical method chlorine dioxide generator. Currently, chemical method chlorine dioxide generator is the mainstream. Electrolytic method chlorine dioxide generator is being phased out because of large power consumption, high operating costs, low chlorine dioxide productivity and high failure rate. Chemical method chlorine dioxide generator are often applied in drinking water, waste water, swimming water and cooling water, of which drinking water and waste water are the main applications.
