The global CHPTAC market was valued at 17.19 Million USD in 2021 and will grow with a CAGR of 3.59% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

CHPTAC is an abbreviation of 3-chloro-2-hydroxypropyltrimethyl ammonium chloride. Chemically CHPTAC is known as Liquid Cationic Etherification Agent with a molecular formula $C_6H_{15}Cl_2NO$. CHPTAC has a molecular weight of 188.10. CHPTAC is widely used in paper industry, petroleum industry, water treatment industry, commodity chemical industry and others. CHPTAC is a colorless transparent fluid with a PH value between 3.0-5.0 and a density of 1.16 when stored at 20 °C. At room temperature, CHPTAC is a liquid cationic etherification agent. CHPTAC finds its applications in cationisation of starch, synthesis of carnitine salts, quaternisation of guar protein and cellulose. In consumption market, USA and China are the mainly consumption regions due to the bigger demand of downstream applications. In 2017, these two regions occupied 74.08% of the global consumption volume in total. CHPTAC has mainly two types, which include CHPTAC 69% and CHPTAC 65%. With advantages of CHPTAC, the downstream application industries will need more CHPTAC. So, CHPTAC has a huge market potential in the future, especially in Asia-Pacific region. The major raw materials for CHPTAC are epichlorohydrin, trimethylamine, hydrochloric acid, and other auxiliary chemicals. Fluctuations in the price of the upstream product will impact on the production cost of CHPTAC. The production cost of CHPTAC is also an important factor

which could impact the price of CHPTAC. We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents fluctuation according to the economy development status and international competition. Also, there is fluctuation in gross margin.
