Chromium is a steel-gray, lustrous, and hard metal that finds wide use as a catalyst or in alloys. All chromium compounds have intense and varied colors. Chromium is used as a hardener in steel, for the manufacture of stainless steel and many useful alloys. It is also employed to give glass an emerald green color. Chromium does not oxidize in air, even in extreme moisture. Chrome Metal Powder is a white grey powder and particle size less than 1mm. Thanks to its very high corrosion resistance against many different acids and bases as well as hot gases, Chrome Metal Powder is a popular material for all types of protective coating. The Chrome Metal Powder industry concentration is not high; there are more than 50 manufacturers in the world, and high-end products mainly from America European and Japan. In the world wide, giant manufactures mainly distribute in American, Europe and Japan. EXO Tech in USA has perfect products. As to France, the DELACHAUX Group has become a global leader. In Germany, it is GfE that leads the technology development. In China, the manufactures focus in Hunan and Anhui province.
