Chromium is a chemical element with symbol Cr and atomic number 24. It is the first element in group 6. It is a steely-grey, lustrous, hard and brittle metal which takes a high polish, resists tarnishing, and has a high melting point. Asia Pacific was the largest market in 2017, accounting for 50.2% of the global revenue. The regional market is anticipated to offer several opportunities over the forecast period. Presence of major stainless steel manufacturing units in countries such as China, India, and Japan is contributing toward increased demand for chromium in the region. Moreover, India is a major chromium ore producer and exporter, while China is a major importer in the global market. These factors are anticipated to further fuel demand over the forecast period.
