Instrumentation Cables are wires that allow for a signal to be put into one end and give the same signal at the other end without distortion. Along with power cable and control cable, instrumentation cable is one of the most important electrical cables. Class 1E Nuclear Power Plant Instrumentation Cables is the cables used in instrumentations with highest security requirements in a nuclear power plant (NPP). The largest class 1E nuclear power plant instrumentation cables markets have been China, Europe and USA. And the market is supplied by a combination of large multinational firms and smaller local manufacturers. The leading global firms include Nexans, General Cable, RSCC Wire & Cable, Habia Cable and TMC, among others. These companies tend to compete against each other globally to supply most of the largest class 1E nuclear power plant instrumentation cables markets. In many markets, these leading global firms also face competition from local manufacturers. In China, for example, local manufacturers supply the bulk of the market. China has become the world's largest market for smart electricity meters as a result of several initiatives by the Chinese national government. The demand for class 1E nuclear power plant instrumentation

cables in China is expected to grow from 849.9 km in 2015 to 1120.4 km by 2021. Due to the high profit in the production, sales of Class 1E Nuclear Power Plant Instrumentation Cables, in the future, more and more enterprises will enter into this industry, especially the products used in-containment. In the next years, it is estimated that the global production and consumption will continue developing with a stable growth rate and the driving force mainly comes from the emerging market, like China, Brazil, and so on. Despite the presence of competition and brand effect problems, due to the awareness of end-users and their demand for high end products, investors are still optimistic about this area. There will be more new investors entering into this industry in the future. The manufacturers who want to occupy the market must depend on market mechanism reform, core technology improvement, manufacturing equipment innovation, and brand establishment.
