The global Cleaning Robot market was valued at 171.76 Million USD in 2021 and will grow with a CAGR of 15.13% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A cleaning robot, often called a robovac, is an autonomous robotic vacuum cleaner which has intelligent programming and a limited vacuum cleaning system. The cleaning robot market in APAC is expected to grow at the highest CAGR during the forecast period. Rise in disposable income among consumers in APAC has led to the adoption of cleaning robots. The increasing adoption of cleaning robots and the influx of global players, along with the emergence of native players, are helping the market to grow. As a result, APAC holds a significant share of the overall cleaning robot market. The cleaning robot market for the residential application is expected to grow at the highest CAGR between 2018 and 2023. Cleaning robots in the residential application are utilized to perform tasks such as mopping and cleaning. In certain countries, employing domestic workers becomes too expensive; in such cases, cleaning robots can easily undertake the task of cleaning.
