The global Clinical Laboratory Services market was valued at 1066.73 Million USD in 2021 and will grow with a CAGR of 5.02% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Clinical laboratory services are tests provided by a medical lab that aid in diagnosis and treatment of patients. Rising concern pertaining to cost control, increasing the pace of R&D for new products, and demand for improvement in quality control parameters has resulted in pressure on lab personnel. Moreover, there has been continuous progress in a number of compounds screened in clinical settings which further demands development in this field. Improvement and implementation of informatics and automated data management solutions to perform seamless operations are anticipated to drive growth in this market. However, sample preparation and running it through experimental protocols with enhanced productivity is still a challenge in these labs.
