The global CNC Controller market was valued at 2508.29 Million USD in 2021 and will grow with a CAGR of 2.32% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact wwhich will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market verdors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Computer numerical control is the automation of machine tools by means of computers executing pre-programmed sequences of machine control commands3-axis CNC machines are projected to account for the largest share of the global controller market during the forecast period. The implementation of these machines in the manufacturing of parts improves speed and accuracy of the production process. However, the market for controllers in 5-axis CNC machines is expected to witness higher growth between 2017 and 2023. Controllers are used in 5-axis CNC machines for manufacturing complex machine parts in critical industries such as aerospace and defense. They enable the manufacturing of critical aircraft components more accurately.
