### Abstracts

The global Coated Steel market was valued at 2079.16 Million USD in 2021 and will grow with a CAGR of 3.01% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The coated steel industry finds its application majorly in building & construction, appliances, automotive, and other industries, which includes AHU, generator canopy, signage, solar heaters, lighting fixtures, furniture, metal doors & frames, and decking profilers. The growth of building & construction application is driven by increasing urbanization in Asia-Pacific and RoW, which resulted into increased demand for residential, commercial, and industrial infrastructure. Low interest rates on housing loans are also responsible for increase in the demand for new houses, eventually driving the market. Currently, the Asia-Pacific region is the largest market of coated steel and is estimated to witness the highest CAGR. Countries such as China, India, Japan, and South Korea are expected to lead the Asia-Pacific coated steel market, with China accounting for the largest share in the regional demand for coated steel. Currently, the market size, in terms of volume, for coated steel is comparatively low in Mexico. However, Mexico is expected to grow at the highest rate in the North America region.
