## Abstracts

The global Coating Additives market was valued at 589.43 Million USD in 2021 and will grow with a CAGR of 5.5% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Water-borne formulations dominate the market among all the formulation types. With increasing environmental regulations, the market share of coating additives for solvent-borne system is decreasing. The demand is shifting toward the water-borne and powder-based coating additives due to stringent environmental regulations. However, solvent-borne is still being significantly used in Asia-Pacific and South America though its use has drastically reduced in Europe and North America. Architecture is the major application of coating additives. The growing commercial and residential construction in Asia-Pacific is driving the demand for coating additives for better protection of buildings. In addition, the growing automotive sector in regions such as Asia-Pacific and South America is catalyzing the demand for high-performance coating additives.
