Abstracts

The global Coating Pretreatment market was valued at 392.53 Million USD in 2021 and will grow with a CAGR of 5.14% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Currently, Asia-Pacific is the largest market for coating pretreatment, both in terms of volume and value, followed by Europe and North America. Countries such as the U.S., China, and Germany are the major markets of coating pretreatment. Due to the increasing demand on domestic front, rising income levels, and easy access to resources, Asia-Pacific has emerged as the leading market of coating pretreatment. South America, especially Brazil, has also emerged as a key market for coating pretreatment manufacturers. Not only is the demand for coating pretreatment expected to be strong in Brazil, but its proximity to the U.S. makes it an emerging market for setting up production facilities. Stringent government regulations in the U.S. and Europe, especially to reduce air pollution, will trigger the need for adopting new, low-pollution coating technologies. The chromate free pretreatment coating are nowadays used as a substitute of chromate-based pretreatment due to its environmental friendly nature. It also adheres to the regulations of REACH and other institutions. It is the fastest-growing market among all types of coating pretreatment in Europe and North America. It is used for pretreatment of aluminum and light alloys. The growth is mainly attributed to its ecofriendly nature as these are based on titanium and zirconium chemistries, and they

are less harmful and eco-friendly in nature.
