Abstracts

The global Coating Resins market was valued at 2574.91 Million USD in 2021 and will grow with a CAGR of 2.92% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

High performance coatings , automotive, and wood coating applications are estimated to witness the best growth prospects for coating resins. High performance coatings include yacht, marine, and aerospace coatings, where there is an increase in demand for green coating products along with improved performance and durability. The use of green coating is expected to help in reducing the costs in the aerospace industry. The marine coatings market is strongly dependent on new building activity, while maintenance and repair is a less cyclical business. The biggest market for coating resins is Asia-Pacific, followed by Western Europe and North America. It is estimated that Western Europe will record a moderate growth due to strong regulations for coating resins. Factors such as huge and increasing addressable population base, rapidly growing construction activity, and increase in the number of automobiles, wooden furniture, and other electronic appliances are driving the growth of the Asia-Pacific coating resins market.
