Coating resins are covering applied on the surface of object to achieve hardness, corrosion resistance, weather resistance, and stain resistance. Resins offer quick drying times, gloss retention, and superior weathering to coatings. Increase in architectural coatings demand drive the growth of the market. In addition, rise in demand for green and environment-friendly coating systems in architectural designs is expected to boost the market growth. In the roadways marking, there is a high demand for coating resins owing to its weather resistance properties, which in turn is responsible for reducing maintenance cost of roads. The increase in production of automobiles is also another factor expected to escalate the growth of the coating resins market.
