Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Coffee machine is cooking appliance used to brew coffee. Common commercially available coffee machine contains different types using different brewing principles. Its application includes household, office and commercial consumption. The technical barriers of coffee machine are high, and the core technology of coffee machine concentrates in relative large companies including Keurig Green Mountain, Panasonic, Nestl? Nespresso, Jarden, Delonghi, Electrolux, Melitta, Morphy Richards, Philips, and Hamilton Beach. These companies mainly concentrate in USA, Europe. However, more than 80% of coffee machine are mainly produced by the Chinese enterprises for OEM. Coffee machines are widely used in caf?, hotel, restaurant, companies, home, etc. As the demand increases rapidly with higher spending propensity and a rising demand for coffee in emerging regions, such as in China, the demand for coffee machine is expected to continue increasing during the remaining years of the forecast period of 2017-2022. Coffee machine industry will usher in a stable growth space. In the past few years, the price of coffee machine has a little change and we expect the price will slightly lower. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of

coffee machine. As the same time, companies are focusing on technological innovation, equipment upgrades, and process improvements, to reduce costs and improve quality. With the snatch for market share in emerging regions, the competition in coffee machine industry will become more intense.
