### Abstracts

The global Cognitive Radio market was valued at 312.11 Million USD in 2021 and will grow with a CAGR of 14.34% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The cognitive radio market is segmented on the basis of components into software tools, hardware, and services. The software tools segment is expected to hold the largest market size during the forecast period. Software tools play an important role in the cognitive radio market. Components that are integrated with the hardware of the radio communication systems, such as amplifiers, detectors, and modulators/demodulators, are embedded using the related software tools. Therefore, software tools are an important component of the cognitive radio ecosystem. In the applications segment, the spectrum sensing application is expected to hold the largest market size during the forecast period. The spectrum sensing application of the cognitive radio involves observing and updating the status of the spectrum and the movement of the licensed or primary users, by periodically sensing the frequency band. Spectrum sensing enables the cognitive radio transceiver to sense any spectrum hole or idle spectrum at a particular time, location, or band. It also identifies the way of accessing the spectrum hole without interfering the communication of the primary users. In the end-users segment, the government and defense segment is expected to have the largest market size during the forecast period. The governments of various countries

are focused on developing and implementing advanced communication technologies, such as cognitive radios and Software-Defined Radio (SDR), for serving the requirements of the modern nature of warfare as well as ensuring public safety and security.
