The global Collaborative Robot (Cobot) market was valued at 1314.92 Million USD in 2021 and will grow with a CAGR of 52.54% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Collaborative robot (Cobots) is a robot intended to physically interact with humans in a shared workspace. In addition, a collaborative robot is less bulky and much easier to operate than other equipment when loads between 50 and 100 kilos must be handled. This is in contrast with other robots, designed to operate autonomously or with limited guidance, which is what most industrial robots were up until the decade of the 2010s. Cobots can have many roles ? from autonomous robots capable of working together with humans in an office environment that can ask you for help, to industrial robots having their protective guards removed as they can react to a human presence under EN ISO 10218 or RSA BSR/T15.1. Collaborative Robot (Cobot) are popular due to their high return on investment and low overall cost, attracting many small and medium sized enterprises (SMEs). Global manufactures mainly distributed in Europe, North America, Japan. Demand for Collaborative Robot (Cobot) is profoundly dependent on increase in automation industry. Universal Robots accounted for 58.04% of the global Collaborative Robot (Cobot) sales market share in 2017. Other players accounted for 12.70%, 12.59% including ABB and Kawasaki.
