Collagen peptides are easily digestible, cold-soluble, and highly bioactive sources of collagen. Collagen peptides are the bioactive peptides derived from the enzymatic hydrolysis of collagen. These peptides are derived by breaking down molecular bonds between individual collagen strands to peptides. Although collagen peptides are not precisely the same as gelatin, both gelatin and collagen peptide originate from collagen and are proteins made from amino acids. Gelatin is a colorless, translucent, flavorless, and brittle food additive derived from collagen present in several animal body parts. Gelatin is a colorless, translucent, flavorless, and brittle food additive derived from collagen present in several animal body parts.
