The global Collagenase market was valued at 78.88 Million USD in 2021 and will grow with a CAGR of 2.35% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Collagenase, obtained from *Clostridium histolyticum*, is an enzyme used for tissue dissociation in vitro and thus for isolation of many different types of cells. These isolated cells are then used for numerous clinical and research applications. The technical barriers of collagenase are high, and the collagenase production concentrated large companies including Nordmark Arzneimittel, Worthington Biochemical, Roche, Thermofisher, Qiaoyuan and others. They are mainly located in USA, Germany, and Switzerland. There are companies adding new capacities and aims at the cost and quality leadership which shall improve profitability. As the same time, companies are focusing on technological innovation, equipment upgrades, and process improvements, to reduce costs and improve quality. The competition in collagenase market will become more intense.
