Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Collision avoidance sensors are safety systems, which are designed to detect obstacles in the path and reduce the risks of accidents. These systems are based on the principle of SONAR used in submarines and ships. They are extensively used in cars, aircrafts, and other automotive vehicles. Increased incorporation of collision avoidance sensors in self-driving cars & supersonic jets and rise in demand for these systems in niche applications fuel the growth of the market. Collaborations and mergers of automotive and defense industries have resulted in innovation of new products, which can be integrated with collision avoidance sensors.
