Aircraft aftermarket parts play a significant role in the maintenance and repair of an operational aircraft fleet. The high cost of fleet replacement and loss of revenue caused due to aircraft on ground (AOG) situations are the prime factors that are increasing the demand for aftermarket parts. Our industry research analysts have estimated that regions in EMEA will contribute significantly to the growth of the commercial aftermarket services market throughout the predicted period. Mature aviation markets offer high flight connectivity and high growth opportunities, driving the growth potential of the aircraft parts suppliers.
