The global Commercial Drones market was valued at 2213.1 Million USD in 2021 and will grow with a CAGR of 23.48% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

An unmanned aerial vehicle (UAV), commonly known as a drone, is an aircraft without a human pilot aboard. UAVs are a component of an unmanned aircraft system (UAS); which include a UAV, a ground-based controller, and a system of communications between the two. The flight of UAVs may operate with various degrees of autonomy: either under remote control by a human operator or autonomously by onboard computers. The growing adoption of smartphones, rising demand for aerial services, and increased demand for drone services from various sectors would supplement the growth of commercial drone market. Leading players are aiming to explore new technologies and applications to meet the growing demands of customers. Collaborations and acquisitions would enable them to enhance their product portfolios and expand into different geographies. Emerging economies would provide opportunity for growth and expansion. Vendors are developing specialized solutions for small and medium-sized businesses to meet their specific business requirements.
