Composite Cylinder is a high pressure vessel that is made of a composite-polymer material and placed in a plastic body. The technology of manufacturing a modern composite cylinder is a very complex and high-tech process, so its cost is much higher than the cost of a metal analogue. The global composite cylinders industry has a rather high concentration. The major manufacturers are concentrated in North America and Europe, such as Luxfer Gas Cylinder, Hexagon Composites, Aburi Composites, Faber Industrie and Worthington Cylinders. At present, Luxfer Gas Cylinder is the world leader, holding 17.76% revenue market share in 2017. Global market is expected to witness significant growth on account of rising applications, so in the next few years, composite cylinders consumption will show a trend of steady growth. In 2024 the consumption of composite cylinders is estimated to be 10327 K Un
