The global Composite Insulators market was valued at 2596.62 Million USD in 2021 and will grow with a CAGR of 9.7% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Composite Insulators are special insulation controls, which include ?core? and ?housing?. The core is usually made of resin-impregnated glass fibers. The housing can be manufactured from a variety of materials including elastomers, resins, or fluorocarbons. Compared with ceramic insulators and glass insulators, composite insulators are less costly, lighter in weight, and have excellent hydrophobic capability. The Composite Insulators industry concentration is scattered; there are about 29 mainly manufacturers in the world, and the products mainly from China and Europe.
