The global Composite Resin market was valued at 1821.41 Million USD in 2021 and will grow with a CAGR of 3.24% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Composite resin is a low-molecular-weight organic compound, which is normally used as organic matrix in the production of composite material. Composite resin is split between thermosets (mainly liquid resin) and thermoplastics (solid resin). Composite resin formulations vary depending on the process used to fabricate the part and the requirements of its end-use application. The composite resin industry is fragmented. The global composite resin industry's top seven producers are estimated to account for 49.07% of industry production in 2015 with facilities located around the world. Although the industry is not concentrated these companies tend to dominate the markets in many countries by establishing production bases, meaning that they often directly control the packing and distribution of their product. The biggest global composite resin companies in the world are the Hexion, Huntsman Corporation, Polynt, Olin, Royal DSM, Reichhold and BASF etc.
